

Double Sided Tapes

RGH have over 25 years of experience supplying and converting a range of high quality double sided tapes.

The range of tapes has been developed in an attempt to have a small number of tapes which will be suitable for a large number of applications.

Whether you require tissue tape, filmic or carrier free adhesives, please discuss your application with our sales team in order for them to recommend the ideal solution for your needs.

RGH are also converters of 3M industrial tapes and VHB adhesives. Please call for further details.

RGH have the capability to produce tapes in many formats including rolls, discs, pads, strips (of any length) and bespoke die cut components.
